

Raising the presentation bar!

Own label greaseproof paper was introduced in the last issue of *What's Hot?* and since then a number of you have now requested your own design.

Printed greaseproof serves a main important purpose; it provides a final, professional finishing touch to the presentation of Fish & Chips or, in fact, any other fried food that you are serving.

Use as a liner for trays or boxes

You don't have to have your own label boxes or trays to use it. We can print greaseproof paper as a wrapping for burgers or kebabs.

Don't underestimate the impact of presentation.

Within reason, we can provide any size of printed greaseproof paper.

Minimum Print Run: From 50,000 sheets depending upon the size of the paper required.

Pack Size: 1,000 sheets.

Price: Dependent upon the size of paper and the number of printing colours required. From only 1p per sheet.

Delivery: 4 to 5 weeks from the artwork being approved. All of the printed product must be taken in one delivery. It takes up very little room.

Origination Cost: This is a one-off set up charge of £175 + V.A.T.

If you use plain white polystyrene boxes you could really improve the image of the packaging by lining the box with your own-label greaseproof paper! It will make a great difference to the presentation and it's a cost-effective way of having your own label packaging

The price of this finishing touch is very small but the overall impression that it creates is priceless!
