Welcome!

Welcome to our festive edition of What's Hot! However you celebrate the season, there's always something under the tree for you in our magazine – and as a gift from the Colbeck family and all of our colleagues, we hope you enjoy your 2027 calendar.

FREE Calendar (worth £7.50).
We hope you enjoy using the colourful 2027 calendar enclosed in this issue. Never miss an important date! It's been produced in support of **The Fishermen's Mission**, who you can meet at our Edinburgh Expo on February 21st 2027.

National Chip Week Success!
A huge **thank you** to everyone who joined in this important week for our industry – we hope you downloaded our free point of sale and social assets pack. **The social media engagement this year especially was at an all time high!** Businesses showcased all things 'chip' – from profit generating loaded fries, to single servings of varying portion control sizes.

Save + Select Rewards – how will you spend yours?
It's that time of year to choose which rewards to redeem. A Love2Shop egift or gift card (with so many choices to spend them on), Sainsbury's or Amazon rewards, a Henry Colbeck credit with a **10% FREE** boost, National Federation of Fish Friers membership, or donate to The 'Mish'? The choice is all yours. Plus - **Be an Earlybird and redeem by Friday 20 November 2026 - you could win a Xmas hamper**

National Fish and Chip Awards.
Every day takes us closer to finding out the winners of the 2027 awards, and once again we're pleased to sponsor this important event in both the takeaway and restaurant categories. Whether you're in the running or choose not to, this national award grabs the media's attention and keeps Fish & Chips in the headlines in a positive way. It's a win-win situation for us all.

Wishing you all a busy trading period running up to Xmas and we're looking forward to sharing a wealth of ideas with you in the issue to boost your new year sales

Warmest Wishes to you, your families and teams.

Douglas & Georgina Colbeck

QUALITY THAT STARTS AT SEA

Eco Five Cod and Haddock is handled to protect the qualities that matter on the plate: natural colour, firm texture and moisture retention.

Fish remain in water during capture and transfer to minimise stress, before being filleted at sea and CO_2-superfrozen to –35°C within minutes. Lower stress during capture helps reduce lactic-acid build-up, leaving the fish with a higher pH. In real terms, that means firmer texture, better moisture retention, a natural appearance and less drip once thawed.

The result is premium IQF fish with reduced drip loss after thawing and a near-fresh eating quality.
